

Profile Summary

Senior Software Developer with over 5 years of experience designing, optimizing, and maintaining high-performance C/C++ applications. Expertise in Modern C++, system-level programming, performance optimization, design patterns, STL, data structures, and multithreading. Experienced in developing and deploying applications across Windows and Linux environments, with proven expertise in Azure DevOps, Agile methodologies, and AI-driven platforms.

Work Experience

Evalueserve, Gurugram

July 2025 – Present

- Developed and optimized C++ risk analytics modules using STL and quantitative models to improve computation speed and accuracy for leading global banking and financial institutions.
- Modernized legacy codebase to align with the organization’s latest technology stack, refactoring outdated components and adopting modern C++ (C++11/14/17) standards for better performance and scalability.

Siemens Technology, Bangalore (Software Developer)

March 2021 – July 2025

- Designed, developed, and enhanced cybersecurity solutions for energy and industrial systems using C and Modern C++ (C++11/14/17), STL, design patterns, RAII, and multithreading across Windows and Linux platforms.
- Integrated native C++ modules with the .NET ecosystem (Framework, Core, and Standard) using C++/CLI and WPF in Agile/Scrum environments.
- Configured and maintained cross-platform build systems using CMake and Visual Studio. Automated CI/CD pipelines with Azure DevOps, integrating dependency management tools such as Conan and NuGet to streamline build and deployment workflows across Windows and Linux environments.
- Developed unit and integration tests using Google Test and NUnit, achieving 85%+ code coverage and reducing production defects by 45% through advanced debugging and root cause analysis.
- Developed automation scripts using PowerShell and Bash to streamline build processes, deployment workflows, and environment configuration tasks.
- Integrated and maintained secure communication libraries including OpenSSL, MbedTLS, and libcurl, ensuring security compliance, vulnerability patching, and performance optimization.
- Conducted code reviews and enforced best practices to ensure maintainable and scalable solutions, reducing technical debt by 20%.
- Containerized applications using Docker and contributed to microservices-based architectures, improving deployment efficiency and system scalability.
- Collaborated with cross-functional teams in Agile/Scrum environments to translate business requirements into scalable technical solutions and manage sprint planning and release cycles.

ABB, Bangalore (Trainee Software Engineer)

Oct 2019 – Dec 2019

- Designed and developed a C# automation tool to extract, transform, and migrate Control Logic Diagrams (CLD) from legacy devices to ABB systems, improving engineering efficiency and process accuracy.

ABB, Bangalore (Intern)

Aug 2018 – Aug 2019

Technical Skills

- Modern C++, C, C# (.NET), Scripting, Bash, PowerShell, YAML
- Cybersecurity, Azure DevOps, CI/CD, Agile/Scrum, Embedded Systems, Process Automation, Power Systems, Electrical, Standards & Protocols
- Git, CMake, Conan, Visual Studio, VS Code, MATLAB, GitHub Copilot, AI Tools

Corporate & CSR Activities

- Managed lab infrastructure to support product development and team efficiency.
- Coordinated team branding, engagement initiatives, and newsletter publications.
- Led CSR initiatives for school students and engineering scholarship programs.

Education

- **M.Tech (Electrical Power System)** from Nirma University, Ahmedabad - 2019 (CGPA: 8.00)
- **B.E. (Electrical)** from Gujarat Technological University, Ahmedabad - 2017 (CGPA: 8.59)
- **GATE 2018** - Qualified (Score: 397)

Certification

- **Embedded Developer** - Vector India Institute, Bangalore **Jan 2020 – Feb 2021**
- **Electrical Domain Training** - Siemens, Bangalore

Internship / Academic Projects

- Automatic Control Logic Diagram (CLD) Generation for ABB S+ Engineering products.
- Simulation of Distributed Control System (DCS) and I/O modules for power generation automation.
- Automated Angular Phase Shift in 3-Phase Induction Motor with embedded communication.

Personal Details

- **Date of Birth:** 17 June 1996
- **Languages:** English, Hindi, Gujarati
- **Location:** Gurgaon, Haryana
- **Skills:** Leadership, Project Management, Collaboration, Problem-Solving, Curiosity-Driven Learning
